

What is claimed is:

1. A method for providing an electronic lottery ticket using a terminal for inquiring a credit card, a first computer system for allowing an approval for a credit
5 purchase request using the credit card, and a second computer system for issuing an electronic lottery ticket, the method comprising the steps of:

inputting settlement request information including a settlement identifier, a credit purchase data and an electronic lottery ticket purchase data;

transmitting the settlement request information to the second computer through a
10 communication network;

generating an electronic lottery ticket data on the basis of the electronic lottery ticket purchase data;

generating settlement approval information on the basis of the settlement request information; and

15 outputting the settlement approval information and the electronic lottery ticket data to the terminal.

2. A method for providing an electronic lottery ticket using a terminal for inquiring a credit card, a first computer system for allowing an approval for a credit
20 purchase request using the credit card, and a second computer system for issuing an electronic lottery ticket, the method comprising the steps of:

inputting settlement request information including a settlement identifier, a credit purchase data and an electronic lottery ticket purchase data;

transmitting the settlement request information to the second computer through a

communication network;

generating settlement approval information on the basis of the settlement request information for the credit transaction and outputting the settlement approval information to the terminal;

5 generating an electronic lottery ticket data on the basis of the electronic lottery ticket purchase data; and

generating settlement approval information on the basis of the settlement request information for the electronic lottery ticket purchase, and outputting the settlement approval information together with the electronic lottery ticket data to the terminal.

10

3. A method for providing an electronic lottery ticket according to claim 1 or 2, wherein the step of inputting the settlement request information includes the steps of:

inputting the settlement identifier and the credit purchase data to the terminal;

15 and

inputting the lottery ticket purchase data having a lottery ticket purchase price to the terminal.

4. A method for providing an electronic lottery ticket according to claim 3,
20 wherein the step of inputting the settlement request information further includes the step of inputting a lottery number to the terminal.

5. A method for providing an electronic lottery ticket according to claim 1 or 2, wherein the step of generating the electronic lottery ticket data includes the steps

of:

generating an electronic lottery number; and

storing the generated lottery number together with the settlement identifier.

- 5 6. A method for providing an electronic lottery ticket using a terminal for inquiring a credit card, a first computer system for allowing an approval for a credit purchase request using the credit card, and a second computer system for issuing an electronic lottery ticket, the method comprising the steps of:

 inputting settlement request information including a lottery ticket purchase
10 request, a credit purchase data having a lottery ticket purchase price, and a settlement identifier;

 transmitting the settlement request information to the second computer through a communication network;

 generating an electronic lottery ticket data on the basis of the lottery ticket
15 purchase request;

 generating settlement approval information on the basis of the settlement request information; and

 outputting the settlement approval information and the electronic lottery ticket data to the terminal.

20

7. A method for providing an electronic lottery ticket according to claim 6, wherein the step of inputting the settlement request information includes the steps of:

 inputting the settlement identifier to the terminal;

 inputting the lottery ticket purchase request to the terminal; and

calculating a settlement request price by adding a credit purchase price to the lottery ticket purchase price.

8. A method for providing an electronic lottery ticket according to claim 7,
5 wherein the step of inputting the settlement request information further includes the step of inputting an electronic lottery number to the terminal.

9. A method for providing an electronic lottery ticket according to claim 6,
wherein the step of generating the electronic lottery ticket data includes the steps of:
10 generating a lottery number; and
storing the generated lottery number together with the settlement identifier.

10. A compensation method by a lottery ticket using a first computer system
for requesting an approval for a purchase approval request of a purchaser, and a second
15 computer system for compensating the purchase approval request satisfying a
predetermined condition with an electronic lottery ticket, the method comprising the
steps of:

inputting first settlement request information having a credit purchase price to
the first computer system through a communication network;
20 generating settlement approval information on the basis of the first settlement
request information;
generating an electronic lottery ticket data on the basis of the predetermined
condition; and

outputting the settlement approval information and the electronic lottery ticket

data.

11. A compensation method by a lottery ticket according to claim 10,
wherein the electronic lottery ticket is a conditional electronic lottery ticket, and
5 wherein the method further comprises the steps of:

inputting second settlement request information for purchasing the
conditional electronic lottery ticket to the second computer system;
activating the conditional electronic lottery ticket; and
generating and outputting settlement approval information on the basis
10 of the second settlement request information.

12. A compensation method by a lottery ticket according to claim 10 or 11,
wherein the predetermined condition is a credit purchase price extracted from
the first settlement request information.

15

13. A compensation method by a lottery ticket according to claim 11,
wherein the second settlement request information is a point calculated from an
amount paid by credit of the purchaser.

20

14. A compensation method by a lottery ticket according to claim 10,
wherein the settlement is conducted using one selected from the group
consisting of a credit card, a mileage card and a debit card.

15. An apparatus for inputting a lottery number in connection to a terminal

which mediates a credit purchase approval request of a purchaser using a credit card, comprising:

a keypad having a plurality of number keys ranged from 1 to 49 on an upper surface; and

5 a key data output unit for transmitting key data corresponding to each number key to the terminal.

16. An apparatus for inputting a lottery number according to claim 15, further comprising a key data automatic generation unit for automatically generating a
10 predetermined number of key data at random,

wherein a number automatic selection button for selecting the operation of the key data automatic generation unit is further provided on the keypad.

17. An apparatus for inputting a lottery number according to claim 15,
15 further comprising a mode switching unit for switching a number inputting mode of a lottery ticket according to a drawing manner,

wherein the keypad further includes on the upper surface:

a group number selection button for selecting a group number in a drawing type lottery; and

20 a mode selection button for selecting the operation of the mode switching unit.

18. An apparatus for inputting a lottery number according to claim 15, further comprising:

a key data automatic generation unit for automatically generating a predetermined number of key data at random; and

a mode switching unit for switching a number inputting mode of a lottery ticket according to a drawing manner,

5 wherein the keypad further includes on the upper surface:

a group number selection button for selecting a group number in a drawing type lottery;

a number automatic selection button for selecting the operation of the key data automatic generation unit; and

10 a mode selection button for selecting the operation of the mode switching unit.

19. An apparatus for inputting a lottery number according to any of claims 15 to 18, further comprising a display for displaying number information corresponding
15 to the key data.
